

AI Agent Strategy Guide

Mobile Repair Business — Growth & Automation Playbook

PART 1 — 20 AI Agent Ideas: Online / Digital

Lead Generation & Traffic (Agents 1–5)

#	Agent Name	Description
1 ★	Repair Cost Estimator Bot	Widget where customers describe their problem and get an instant price estimate, capturing their contact info in exchange.
2	Is It Worth Repairing? Advisor	Compares repair cost vs. replacement cost for any device, building trust and driving decisions toward booking.
3	Social Media Comment Responder	Auto-replies to comments and DMs on Instagram/Facebook with helpful info and a booking link.
4	Local SEO Content Generator	Produces weekly blog posts such as "iPhone screen repair in [City]" to rank on Google searches.
5	Google Review Responder	Drafts personalised responses to every review, improving local ranking signals.

Booking & Conversion (Agents 6–10)

#	Agent Name	Description
6 ★	24/7 Booking Chatbot	Handles enquiries and books appointments outside business hours, capturing leads that would otherwise be lost.
7	Abandoned Quote Follow-Up Agent	If someone gets a quote but doesn't book, sends a timed follow-up via SMS or email.
8	Device Triage Agent	Asks diagnostic questions to qualify jobs before they arrive, saving technician time.
9	Waitlist & Cancellation Filler	Automatically fills cancelled slots by texting customers on a waitlist.
10	Warranty Upsell Bot	After booking, pitches protection plans or screen protectors with a one-click add-on.

Customer Retention (Agents 11–15)

#	Agent Name	Description
11 ★	Repair Status Updater	Sends automated SMS/WhatsApp updates at each stage: received, in repair, ready for collection. Reduces inbound support calls significantly.
12	Post-Repair Check-In Agent	Messages customers 7 days after collection to ask how the device is working and request a Google review.
13	Annual Device Health Reminder	Reaches out to past customers yearly — "Your repair was 12 months ago — time for a checkup?"
14	Loyalty Points Tracker	Tracks repeat customers and automatically applies discounts or sends referral codes.
15	Recall & Parts Update Notifier	Alerts past customers if a known fault is discovered for their device model.

Operations & Upselling (Agents 16–20)

#	Agent Name	Description
16	Parts Inventory Assistant	Monitors stock levels and flags when common parts are running low, and can auto-order from suppliers.
17	Job Profitability Analyser	Logs each repair type, calculates margins, and suggests which jobs to promote or deprioritise.
18	Competitor Price Monitor	Scrapes competitor websites weekly and alerts if pricing needs adjusting to stay competitive.
19	Referral Campaign Manager	Automatically sends referral links to happy customers and tracks conversions with small rewards.
20	Insurance Claim Helper	Guides customers through claiming phone repairs on their home insurance, removing a common barrier to booking.

Where to start online: Agents 1, 6, and 11 — the Estimator Bot drives traffic, the 24/7 Booking Chatbot converts it, and the Repair Status Updater reduces support call volume.

PART 2 — 20 AI Agent Ideas: Physical Shop Floor

**In-Store AI Agents by Category
(5 agents each)**

Top 3 In-Store Agents — Priority Scores

Customer Check-In & Reception (Agents 1–5)

#	Agent Name	Description
1 ★	Smart Check-In Kiosk	Tablet at the front desk where customers tap their device model, describe the fault, and receive a repair ticket — no staff needed for intake.
2	Queue Management Agent	Displays estimated wait times and texts customers when their repair is next, so they can step out instead of waiting.
3	Walk-In Triage Assistant	Runs a quick diagnostic questionnaire and tells the customer their likely repair time and cost before speaking to a technician.
4	Multilingual Reception Bot	Greets walk-in customers in their preferred language — especially valuable in diverse urban areas like London.
5	Appointment Check-In Agent	Recognises returning customers by phone number, pulls up their history, and alerts the technician they have arrived.

In-Store Sales & Upselling (Agents 6–10)

#	Agent Name	Description
6	Accessories Recommender Screen	A display showing "Customers with your phone also bought..." — cases, chargers, screen protectors — while they wait.
7	Trade-In Value Agent	Customers enter old device details into a kiosk and instantly receive a trade-in quote, encouraging a refurbished handset upsell.
8	Insurance Add-On Pitcher	After the repair is logged, automatically presents a 30-second pitch for a protection plan on a tablet.
9	Bundle Deal Suggester	

If a customer books a screen repair, the agent flags that a simultaneous battery replacement saves labour cost.

10	Refurbished Phone Browser	An in-store touchscreen kiosk showing current refurbished stock with specs, prices, and a reserve button.
----	----------------------------------	---

Technician Support (Agents 11–15)

#	Agent Name	Description
11 ★	AI Repair Guide Assistant	Technicians type a fault description and the agent instantly pulls up the best repair walkthrough, known issues, and part numbers.
12	Fault Diagnosis Agent	Technician inputs symptoms and the agent cross-references known faults to suggest the most likely cause.
13	Parts Lookup & Ordering Agent	Scans a device model and tells the technician which parts are in stock and which need ordering, with one-tap ordering.
14	Repair Time Estimator for Techs	Based on job complexity and current workload, tells the technician how long to quote — keeping promises realistic.
15	Quality Control Checklist Agent	After a repair, walks the technician through a pass/fail checklist before handing the device back to the customer.

Customer Handoff & After-Service (Agents 16–20)

#	Agent Name	Description
16	Repair Summary Explainer	When handing back the device, a screen or printout explains in plain English what was fixed and provides aftercare tips.
17 ★	On-the-Spot Review Requester	As the customer pays, a tablet prompts them to leave a Google review while they're still feeling positive about getting their phone back.
18	Payment Plan Agent	For larger repairs, calculates and presents a simple "pay in 3" instalment option and sends the agreement to their phone.
19	Data Backup Reminder Kiosk	Before repairs begin, alerts the customer if their device has no recent backup and offers a paid backup service on the spot.
20	Uncollected Device Manager	Tracks devices not collected after repair and sends escalating reminders (day 3, 7, 14) via SMS, flagging when to apply storage fees.

Top 3 in-store: Agent #1 Smart Check-In Kiosk (frees up staff), Agent #11 AI Repair Guide (faster technicians), Agent #17 On-the-Spot Review Requester (Google reviews drive local foot traffic).

PART 3 — Financial Analysis: Key Findings

£2,314

Avg Weekly Sales

£1,818

Worst Week

£2,834

Best Week

£800/wk

Salary Cost

~35%

Revenue → Salaries

Income Summary

Metric	Value	Notes
Average weekly total sales	£2,314	Range: £1,818 – £2,834
Cash vs card split	59% / 41%	Cash-heavy — track carefully
Best week	£2,834	Mar 2–8
Worst week	£1,818	Mar 30–Apr 5
Highest-earning days	Saturday & Sunday	Consistently highest cash takings

Most Common Expenses

Expense	Amount / Frequency	Priority Action
Salaries	£800/week (fixed)	Dominant cost ~35% of revenue — review full vs part-time mix
Bangla Tech	Almost every week	Most frequent supplier — negotiate bulk/30-day terms
Revive	Regular	Second most frequent — bundle orders with Bangla Tech negotiations
eBay	Regular	Phones, screens, batteries — consider a dedicated seller account
HMRC Tax	Periodic — £255	Set aside weekly; prevent cash shock at payment date
Council Rates	Periodic — £80–£178	Fixed overhead — budget monthly
Insurance / Ria	Periodic	Track separately to understand true operational cost

Financial Concerns

Cash Flow Risk: End-of-week cash is often dangerously thin — several weeks show negative cash balances before personal top-ups. A minimum cash reserve of £1,600 (2 weeks of salary) is essential.

External Cash Dependency: The business is heavily reliant on personal cash injections to cover high-expense salary weeks. Separating business and personal finances is a critical first step.

Side Venture Not Separated: Perfume stock appears within the same books. Track it separately to accurately measure core repair business profitability.

Current £2,314/week → £3,500/week needed to open a second location

PART 4 — Scaling Strategy: 15 Best Practices

#	Strategy	Detail
1	Fix the Cash Flow Crisis First	Separate business and personal finances. Build a cash reserve equal to 2 weeks of salary (£1,600). Rule: if end-of-week cash is below £200, no discretionary spending.
2	Negotiate Bulk Supplier Pricing	Approach Bangla Tech and Revive for monthly accounts with 30-day payment terms and volume discounts. One bulk order per month for the top 10 most-used parts.
3	Increase Average Order Value	Train staff to offer battery + screen repairs together. Target an average transaction value of £80+ versus the current estimated £40–60.
4	Launch a WhatsApp Broadcast List	Message 200+ past customers instantly at zero cost. One broadcast per week keeps the shop top of mind and drives repeat visits.
5	Formalise the eBay Sales Operation	Set up a proper eBay store for refurbished phones, spare parts, and accessories. Even 5–10 sales per week at £20–50 margin = £400–1,000/month.
6	Introduce a Monthly Repair Membership	£6–8/month: priority service, one free screen protector fitting, 10% off all repairs. 50 members = £300/month guaranteed recurring income.
7	Launch a Refurbished Phone Retail Line	Formalise phone-flipping with a £500–1,000 float. Buy at £40–80, sell at £100–150. Potential: £400–800/month additional margin.
8	Extend Trading Hours on Weekends	Saturdays and Sundays show highest takings. Extending to 7pm could capture £50–100 extra per day — £400–800/month additional revenue.
9	Target the Bengali/South Asian Community	Market in Bengali via WhatsApp, local Facebook groups, and leaflets. Community trust = referrals at near-zero cost.
10	Hire Part-Time Instead of Full-Time	One full-time + one weekend-only drops salary from £800 to £550–600/week — freeing £800–1,000/month for reinvestment.
11	Register on eBay as a Seller	

	Extend reach nationally with a dedicated eBay store for refurbished phones, spare parts, and accessories.	
12	Introduce a Simple Loyalty Card	Stamp card (10 repairs = one free screen protector fitting) costs almost nothing to print but significantly increases return visit rates.
13	Build a Google Business Profile	Fully optimised profile with 20–30 reviews is the single highest-ROI marketing action. Each 5-star review drives 1–3 additional customers per month.
14	Separate Business Finances Completely	Dedicated business account + bookkeeping app (QuickBooks Self-Employed £8/month or free Wave). Enables proper P&L and faster tax returns.
15	Plan for a Second Location After £3,500/week	Current average of £2,314/week needs to reach £3,500 consistently before a second location is viable. Achievable through the combined strategies above.

Implementation Roadmap — Four-phase plan from Month 1 through Month 6+
